Summary

Backend-focused Python Developer with hands-on experience building and maintaining production-level web applications using **Django** and **Django REST Framework**.

Currently working on real-world backend systems involving API design, authentication, and database optimization with **PostgreSQL**. Experienced in integrating third-party services, handling asynchronous workflows, and optimizing performance for scalable applications.

Strong problem-solving mindset with a focus on writing clean, maintainable, and production-ready code.

Experience

Python Developer — Softvence Agency

Jan 2026 – Present

- Developing and maintaining scalable backend systems using **Python**, **Django**, and **DRF**.
- Designing and implementing secure **REST APIs** with authentication, permissions, and role-based access control.
- Optimizing database queries and improving performance using efficient **PostgreSQL** design and indexing.
- Integrating third-party services and debugging complex backend issues in production environments.
- Contributing to deployment workflows, system maintenance, and backend stability improvements.
- Collaborating with frontend teams to deliver reliable, production-ready features.

Technical Skills

Backend: Python, Django, Django REST Framework, REST APIs, JWT, Redis, Celery

Database: PostgreSQL, SQLite

Frontend: React, JavaScript, Tailwind CSS, HTML, CSS

Tools: Git, Docker, GitHub, VS Code

Languages: Python, C, C++

Projects

AI Voice Receptionist SaaS — Backend System

Django, Django REST Framework, PostgreSQL, Redis, Celery, JWT

[Live](#)

- Developed backend systems for an **AI-driven call management platform** enabling automated customer interaction workflows.
- Built **20+ secure REST APIs** with authentication and role-based access control for multi-user business environments.
- Designed and implemented **call event ingestion pipeline** to process external AI service payloads (call logs, transcripts, analytics).
- Engineered **call record management system** including tracking, duration calculation, and structured storage.
- Integrated external services using **JWT-based secure communication** for real-time data synchronization.
- Improved performance using **Redis caching** for frequently accessed API responses.
- Implemented asynchronous task processing with **Celery** for background jobs (email notifications, event handling).
- Designed scalable database models for business, agent, and call-related entities.

VirtualBazar — Freelance Platform

React, Django, Django REST Framework, PostgreSQL, JWT

[Live](#) — [Frontend](#) — [Backend](#)

- Developed a freelance marketplace using **React** and **Django**.
- Built **15+ REST APIs** with JWT-based authentication.
- Improved backend performance and integrated payment gateway functionality.

PhiMart — E-commerce Platform

React, Django, Django REST Framework, PostgreSQL

[Live](#) — [Frontend](#) — [Backend](#)

- Built full-stack e-commerce platform using **Django**, **React**, and **PostgreSQL**.
- Optimized product filtering APIs for efficient handling of large datasets.
- Improved frontend performance using reusable component architecture.

Education

B.Sc. in Computer Science (Ongoing)

2024 – 2027

Bangladesh University of Business and Technology (BUBT)

Certifications

CSE Fundamentals with Phitron (2024)
Mobile App Development with Dart & Flutter
International Leadership Competition

Languages

English (Intermediate), Bengali (Native)
