SUMMARY

Backend-focused Python Developer with hands-on experience building production-ready web applications using **Python**, **Django**, and **Django REST Framework**.

Experienced in designing secure REST APIs, authentication systems, database optimization with PostgreSQL, asynchronous task processing using Redis and Celery, and integrating third-party services.

Passionate about writing clean, scalable, maintainable backend systems while solving real-world engineering problems.

TECHNICAL SKILLS

Backend	Python, Django, Django REST Framework (DRF), REST APIs, JWT, Redis, Celery
Database	PostgreSQL, SQLite
Frontend	React, JavaScript, Tailwind CSS, HTML, CSS
Tools	Git, GitHub, Docker, VS Code
Languages	Python, C, C++

EXPERIENCE

Python Developer

Jan 2026 – May 2026

Softvence Agency

- Developed and maintained scalable backend systems using Python, Django, and Django REST Framework.
- Designed and implemented secure REST APIs with authentication and role-based access control.
- Optimized PostgreSQL database queries and indexing for improved performance.
- Integrated third-party services and resolved production backend issues.
- Contributed to deployment workflows and backend stability improvements.
- Collaborated with frontend developers to deliver production-ready features.

PROJECTS

AI Voice Receptionist SaaS — Backend System

Django, DRF, PostgreSQL, Redis, Celery, JWT

Live

- Developed backend systems for an AI-driven call management platform.
- Built 20+ secure REST APIs with authentication and role-based access control.
- Designed call event ingestion pipelines for external AI payload processing.
- Implemented Redis caching and Celery for asynchronous task processing.
- Designed scalable database models for call-related entities.

VirtualBazar — Freelance Platform

React, Django, DRF, PostgreSQL, JWT

Live — Frontend — Backend

- Developed a freelance marketplace using React and Django.
- Built 15+ REST APIs with JWT authentication.

- Integrated payment gateway functionality.
- Improved backend performance and API efficiency.

PhiMart — E-commerce Platform

React, Django, DRF, PostgreSQL

Live — Frontend — Backend

- Built a full-stack e-commerce platform using Django and React.
- Optimized product filtering APIs for large datasets.
- Improved frontend performance using reusable component architecture.

EDUCATION

B.Sc. in Computer Science (Ongoing)	2024 – 2027
Bangladesh University of Business and Technology (BUBT)	

Diploma in Computer Science and Technology	2019 – 2023
Feni Computer Institute	

CERTIFICATIONS

- CSE Fundamentals with Phitron (2024)
- Mobile App Development with Dart & Flutter
- International Leadership Competition

LANGUAGES

English (Intermediate) • Bengali (Native)
