Summary

Backend-focused Python Developer with hands-on experience building and maintaining production-level web applications using **Django** and **Django REST Framework**. Currently working on real-world backend systems involving API design, authentication, and database optimization with **PostgreSQL**. Experienced in integrating third-party services, handling asynchronous workflows, and optimizing performance for scalable applications.

Strong problem-solving mindset with a focus on writing clean, maintainable, and production-ready code.

Experience

Python Developer — Softvance Agency

Jan 2026 – May 2026

- Developing and maintaining scalable backend systems using **Python**, **Django**, and **DRF**.
- Designing and implementing secure REST APIs with authentication and role-based access control.
- Optimizing database queries using efficient PostgreSQL design and indexing.
- Integrating third-party services and debugging backend issues in production.
- Contributing to deployment workflows and backend stability improvements.
- Collaborating with frontend teams to deliver production-ready features.

Technical Skills

Backend: Python, Django, Django REST Framework, REST APIs, JWT, Redis, Celery

Database: PostgreSQL, SQLite

Frontend: React, JavaScript, Tailwind CSS, HTML, CSS

Tools: Git, Docker, GitHub, VS Code

Languages: Python, C, C++

Projects

AI Voice Receptionist SaaS — Backend System

Django, DRF, PostgreSQL, Redis, Celery, JWT

[Live](#)

- Developed backend systems for an AI-driven call management platform.
- Built 20+ secure REST APIs with authentication and role-based access control.
- Designed call event ingestion pipelines for external AI payload processing.
- Implemented Redis caching and Celery for performance optimization.
- Designed scalable database models for call-related entities.

VirtualBazar — Freelance Platform

React, Django, DRF, PostgreSQL, JWT

[Live](#) — [Frontend](#) — [Backend](#)

- Developed a freelance marketplace using React and Django.
- Built 15+ REST APIs with JWT authentication.
- Integrated payment gateway functionality.
- Improved backend performance and API efficiency.

PhiMart — E-commerce Platform

React, Django, DRF, PostgreSQL

[Live](#) — [Frontend](#) — [Backend](#)

- Built full-stack e-commerce platform using Django and React.
- Optimized product filtering APIs for large datasets.
- Improved frontend performance using reusable component architecture.

Education

B.Sc. in Computer Science (Ongoing)

Bangladesh University of Business and Technology (BUBT)

2024 – 2027

Certifications

CSE Fundamentals with Phitron (2024)
Mobile App Development with Dart & Flutter
International Leadership Competition

Languages

English (Intermediate), Bengali (Native)
